

The world's most effective way of putting citizens in touch with their representatives

WriteToThem

Benefits

Proven track record of attracting high numbers of people who've never contacted their representatives before for any reason.

Identify representatives using nothing more than a post-code.

Users are given the chance to **contact any of their representatives**, whether councillors, MPs, MEPs, MSPs or other assembly members.

Helps to **direct correspondence** to the right tier of government, lowering amount of correspondence sent wrongly to councils.

Sophisticated **anti-abuse** measures.

Can be **branded and integrated on any local council website**.

How does it work?

WriteToThem.com is the award winning successor to FaxYourMP.com. It is the only place in the UK at which a UK citizen can identify and contact any of their elected representatives, no matter whether local councillors or MEPs, or anything in between.

Already linked to by dozens of local authorities around the UK, mySociety is now starting to offer branded, integrated versions (like the one above) to run within local authority websites.
